MEDICINE USE IN AUSTRALIA

How prescriptions patterns and chronic health conditions offer different perspectives on Australia's changing healthcare needs.

SECTION 1 - A NATION ON PRESCRIPTION

How has medicine use changed over time, and which categories are most common?

Chart 1: Total prescriptions over time

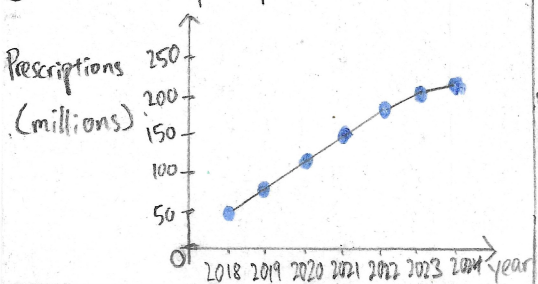

Chart 2: Change by ACT1 category

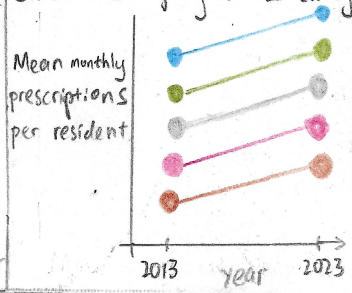

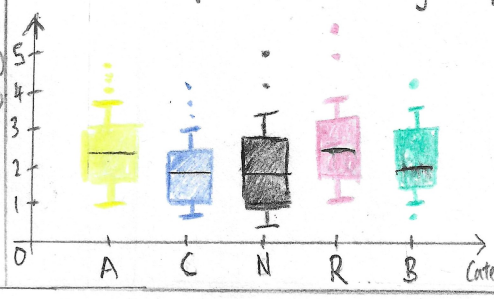

Chart 3: Prescriptions per resident by category

SECTION 2 - DIFFERENT AGES, DIFFERENT MEDICINE

How do prescription patterns vary across age groups and medicine types?

Chart 4: Prescriptions by age Group (Small multiples)

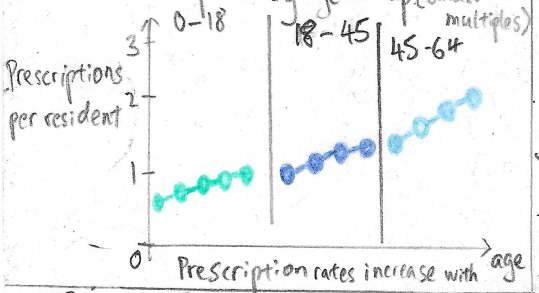

Chart 5: Medicine types by age Group (Mosaic Plot)

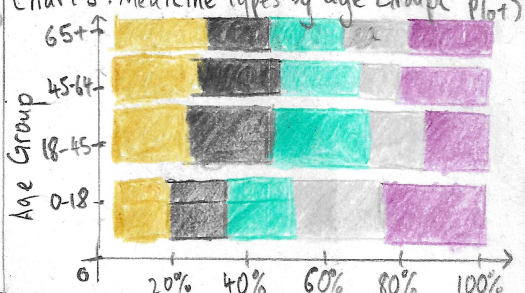

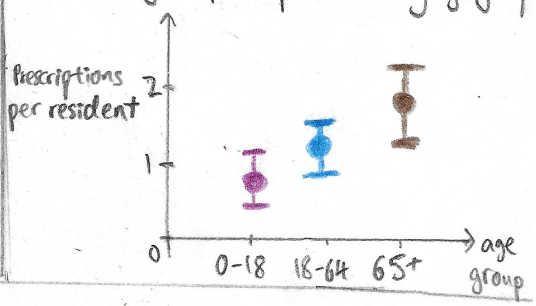

Chart 6: Range of prescriptions rates by age group

SECTION 3 - THE GEOGRAPHY OF MEDICINE USE

Where are prescription rates higher, and how do they relate to socioeconomic factors?

Chart 7: Choropleth Map (Prescriptions rates by State)

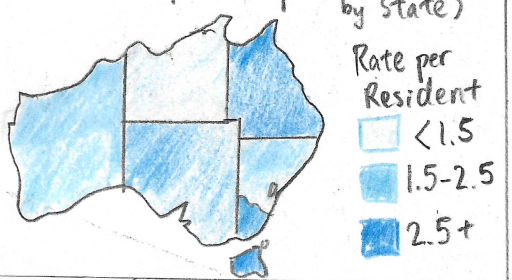

Chart 8: Proportional Symbol Map

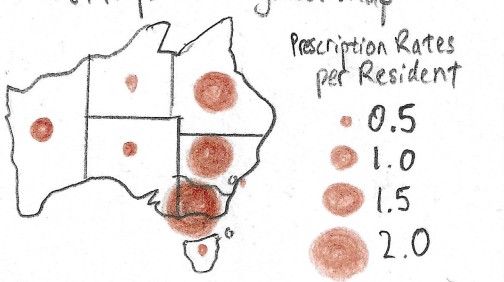

Chart 9: Dorling Cartogram (Prescription Rates by state)

SECTION 4 - Behind the Prescriptions

What do these patterns suggest about changing healthcare needs and chronic conditions?

Chart 10: Chronic Condition Prevalance

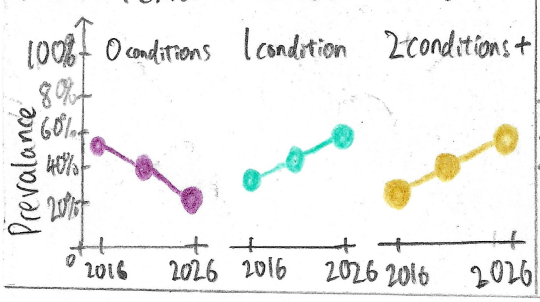

Chart 11: Lollipop Chart (Prevalent Changes)

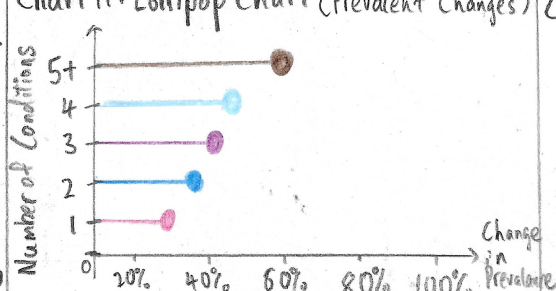

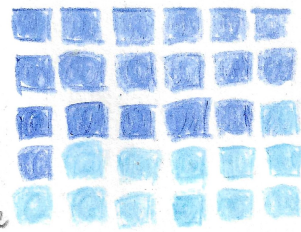

Chart 12: Waffle Chart (Australians with at least 1 condition)

60%

2 out of every 5 Australians report at least one selected chronic condition.
